FRENCH JOBS IN PUNE

At a job site in the Indian city of Pune, Shubham Civil Projects Pvt. Ltd., is using a **Potain** MCi 85 tower crane to help construct a number of local government buildings. With limited space on the downtown job site and a

strong drive from the client to keep project costs to a minimum, Shubham Civil Projects found the MCi 85 to be a perfect solution. Shubham Civil Projects already has a good understanding of the capabilities of the Potain MCi 85, having purchased its first unit in 2014 before adding a second earlier this year.

The MCi 85 lifts 1.3 t at its maximum jib end of 50 m and has a maximum overall capacity of 5 t.

A PART OF EXCLUSIVE DNA

The New12MTX gives another dimension and an added "s" to "performance". Not only does it make it possible to have an excavator, a loader, a forklift and a tool carrier in a single machine, but also to augment the capacities of these functions due to the specific characteristics such as the **Mecalac** articulated boom and frame, the lowered centre of gravity, the rotation of the superstructure, 12MTX AT and the cab mounted **MECALACTV** on the right-hand side. With the New 12MTX numerous features have been combined in order to increase the performance of each function: digging, loading, handling and quick coupler.

A MID-SIZE COMPACT RIG

The new SM-9 is the perfect combination between design and performance, a new multipurpose drilling rig in 8-9 ton class, designed to meet the needs of professionals around the world. Flexibility, low fuel consumption and high efficiency were the designers' guidelines creating this **Soilmec**. The rig is fitted with a new engine Deutz TCD 4.1 (Tier IV) coupled with the new hydraulic system by Rexroth technology. The rig is fitted with proportional, hydraulic servo-assisted controls that make operations smooth. Featured with Load Sensing System, it has lower running costs and a reduced wear and tear on components.
